

Some data on Florence Eliza May and Walter Pocock.
Collected by David Man, April 2014.

1859-60 Florence Eliza May was known as 'Dolly' in the family. She was the elder sister of our direct ancestor Eleanor Ida May. She was born on 12th November 1859 at Montreal, Quebec, Canada, the daughter of Thomas May (1822-1873) and Ida Marie Wolff (1834-1877). Florence was baptized at St. George's Anglican Church in that city on 20th (?) May 1860.

Below Florence's baptism:

WALTER POCOCK'S PROFESSIONAL CAREER

1884 *Transactions of the Willan Society of London: A society for the study of dermatology and syphilis.* Volume. I. It would appear that sometime between 1882 and 1884 Walter qualified as a surgeon (MRCS – Member of the Royal College of Surgeons) and hence, following tradition, is addressed as Mr.

November 6th, 1884.

The annual general meeting took place, and the following gentlemen were elected as officers for the ensuing year :—

- President :* Dr. C. R. Drysdale.
- Vice-Presidents :* Mr. J. L. Milton.
Mr. James Startin.
- Council :* Dr. C. R. Drysdale.
Mr. J. L. Milton.

Mr. J. Douglas Lithgow.
Mr. Walter Pocock.

1884 *Transactions of the Obstetrical Society of London,* Volume 26

Walter **Pocock, M.R.C.S.**, and Adolphus J. Richardson, M.B. (Cantab.), were admitted Fellows of the Society, and Charles Hamilton Hone Cameron, L.R.C.P (Harlesden), was declared admitted.

1887 *The Times* Tuesday, 5th April. Walter Pocock is a partner in a new venture – The London Skin Hospital.

THE LONDON SKIN HOSPITAL.—A new hospital with the above title has been established in Cranbourn-street, Leicester-square, by Mr. James Startin, M.R.C.S., and Mr. Walter Pocock, M.R.C.S., L.S.A., for the treatment of poor persons suffering from affections of the skin, and as a school for instruction in the science and practice of dermatology. There is great prevalence of skin disease among the poorer population of the metropolis. The site in Cranbourn-street has been selected on account of its central position, but the committee intend, as soon as they obtain the necessary funds, to open a branch hospital in one of the poor districts in the East-end of London.

1887 Further reports of the establishment of the new London Skin Hospital.

The Pharmacopæia of the London Skin Hospital. Edited by JAMES STARTIN, Senior Surgeon to the Hospital. London: Harrison & Sons. Pp. 23.

This little book is doubtless useful to the attendants at the London Skin Hospital. It contains a few of the formulæ to be found in all the recent text-books; some good, some poor. There is, or should be, little popular demand for books of this class, excellent as they may be in themselves and for the purpose for which they were primarily compiled.

1887 *London Medical Press and Circular*. 9th March

The London Skin Hospital.

It appears to have become a rule almost without exception that out of each hospital dispute shall evolve another special hospital. Thus the original Hospital for Diseases of the Throat, in Golden Square, is the focus from whence two or three others have sprung, one; and now another skin hospital springs into existence, from a "scandal" at St. John's Hospital for Diseases of the Skin, Leicester Square, the centre of many previous eruptions. And on the principle that there is nothing like bringing sin home to one's very door, the "London Skin Hospital" has been opened in Cranbourne Street, within a few yards of its foster parent; and we are requested to announce that as an initiatory step of the Committee of Management, the following appointments have been made: — Mr. Jas. Startin, M.R.C.S.; **Mr. Walter Pocock, M.R.C.S.**; and Mr. Edward Joseph Barry, M.D. Ed., M.R.C.S. Eng. to be Honorary Medical Officers to the Hospital; and Mr. Startin, Lecturer.

1889 *Reynolds's Newspaper*, Sunday, 3rd November. Walter is briefly mentioned in a news story.

Yesterday, Mr. G. P. Wyatt, deputy coroner for East Surrey, received information of the death of Charles Stokes, aged thirty-eight years, a plasterer, lately residing at 198, Railton-road, Brixton. The deceased was engaged in unloading a sand-cart in the Stockwell-park-road, and fell over the side of the cart into the road. His father-in-law, Richard Roberts, who witnessed the occurrence, at once ran to his assistance, and, finding that he was unconscious, sent for Dr. Walter Pocock, of Brixton-hill, but upon that gentleman's arrival, life was found to be extinct.

1889 *The London Gazette*, 15th November. Announcement of the dissolution of a business partnership between Walter and Adam R.H. Oakley.

NOTICE is hereby given, that the Partnership heretofore subsisting between us the undersigned, Walter Pocock and Adam Robert Hamilton Oakley, under the firm of Pocock and Oakley, at 374, Brixton-road, in the county of Surrey, in the practice and profession of Medicine, Surgery, and Midwifery, has been dissolved, by mutual consent, as from the 29th day of September, 1889, and the business will be henceforth carried on by the said Walter Pocock alone, who will pay and discharge all debts and liabilities and receive all money payable to the said late firm.—Dated this 7th day of November, 1889.

EMMIGRATION TO THE UNITED STATES

1892 Walter emigrated to the U.S. and a year later Florence and their three children followed. The US naturalization papers have not been located yet. On various sources it states that the naturalization of Walter's children took place on 25th May 1898 at Jersey City, New Jersey.

Note on Mt Hermon School: Founded by the 19th century evangelist Dwight Lyman Moody in 1881, the school aimed to educate young people who had limited access to education because they were poor. Moody hoped to create generations of committed Christians who would continue his evangelical efforts. While the Bible was the primary tool for instruction in the early days, the institution was never dogmatic. Religious instruction was accompanied by a challenging academic program similar to that of other private secondary schools of the era. (← from the school's website). I have also found a record on the census for Sidney FL Pocock at Mt Hermon but the transcriber says he was born in Maine; perhaps an error?

1901 Walter Pocock died on 23rd June and a copy of the official New Jersey state 'Report of Death' has been recovered. From it we learn that Walter died at 922 Avenue D, Bayonne, New Jersey. He had been living in the US for ten years and he was 48 years old at the time of death. The cause of death was Angina Pectoris, nephritis. He had been ill for a month before death and had been attended during that time by a Dr. Stevens who resided at 150 Avenue D in Bayonne. Walter was buried at Bay View Cemetery, Garfield Avenue, Jersey City, New Jersey.

Sidney Pocock and ? Gladys

1918 Arrival at Liverpool on board the Adriatic but I am not absolutely sure this is "our" Florence. Why Essex?

1920 US census Florence and her daughter Gladys are transcribed as ‘Popcock’. Surprisingly Gladys has an ‘m’ next to her name indicating that she is married, but without indicating what her married name is. We know from her mother’s death registration, which was made by Gladys one month after this census was taken, that she was married to a man named Collyer. On this census they do not state any occupation. No street address is given, only the electoral district in which they are living - Manhattan Assembly District 20, New York, New York. However, since Florence died a month later her death registration gives us more detail (see below).

1920 According to her death certificate/registration Florence Pocock died on 6th February at 2051 Fifth Avenue in Manhattan, New York. (Her date of birth is given incorrectly as 6th February 1861 whereas she was in fact born on 12th November 1859). Her age is given as 59 whereas she was in fact aged 60. Her occupation is ‘none’. The cause of death is given as influenza with diabetes mellitus a secondary cause. It also says that her mother was born in Canada whereas she was born in Hamburg, Germany. Florence was buried on 9th February at Bay View Cemetery, New Jersey where her husband Walter had been interred over a decade previously.

The undertaker, Samuel Watson, is employed by Gladys F Collier the daughter of the deceased. Thus confirming what the 1920 census says which is that Gladys is married. The 1920 census was conducted on 6th January, just a month before Florence Pocock died. Both sides of Florence’s death certificate are shown below:

TO PHYSICIANS.

- The attending physician must furnish a certificate to the Department of Health within 24 hours after death, and where death has resulted from infectious or contagious disease a certificate must be furnished by him forthwith (Sanitary Code, Sections 135 and 161).
- All physicians practicing in The City of New York (including those in public institutions) must be registered in the Bureau of Records (Sanitary Code, Section 150).
- If a person die from criminal violence or by a casualty, or by suicide, or suddenly while in apparent health, or when unattended by a physician or in prison, or in any suspicious or unusual manner, it shall be the duty of any citizen who may become aware of the death of any such person to report such death forthwith to the office of the chief medical examiner, and to a police officer who shall forthwith notify the officer in charge of the station house in the police precinct in which such person died. Any person who shall willfully neglect or refuse to report such death or who without written order from a medical examiner shall willfully touch, remove or disturb the body of any such person, or willfully touch, remove, or disturb the clothing or any article upon or near such body, shall be guilty of a misdemeanor. (Inserted by Laws 1916, ch. 254 & 2. In effect Jan. 1, 1915.)
- Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death:

Abortion,	Hemorrhage,	Meningitis,	Phlebitis,
Cellulitis,	Gangrene,	Metritis,	Pneumonia,
Childbirth,	Gastritis,	Miscarriage,	Septicemia,
Convulsions,	Erysipelas,	Peritonitis,	Tetanus.

(Any one of these may be the result of an injury, and thus be a subject for investigation by a Medical Examiner. If it is not, the certificate should make that fact plain.)

- No certificate giving "Heart failure," "Dropsey," or other mere symptoms as the sole cause of death will be accepted, unless accompanied by a satisfactory written explanation.
- Statement of Occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g. Farmer or Planor, Physician, Compositor, Architect, Locomotive Engineer, Civil Engineer, Stationary Fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Sattman, (b) Grocery; (a) Foreman, (b) Automobile Factory.

TO UNDERTAKERS.

- No burial permit can be obtained without a proper certificate.
- Certificates must be written throughout in black ink.
- No certificate will be accepted which is mutilated, illegible, inaccurate, or any portion of which has been erased, interlined, corrected or altered, as all such changes impair its value as a public record.

I hereby certify that I have been employed as undertaker by *Gladys F. Peck* (deceased) the *deceased* of *Manhattan* County, New York. This statement is made to obtain a permit or to burial or cremation of the remains of deceased *Florine E. Peck*

Signature: *William B. Peck*

:

POCOCK.—On July 19, 1916, at his residence, Edwards, N. Y., Cecil, beloved husband of Gwendoline Pocock, son of the late Dr. Walter Pocock of Bayonne, N. J. Funeral services at his late residence Thursday, July 20, at 3 P. M.

CECIL'S WIDOW GWENDOLINE (Gwen) SUTTON-FALK

1881 She was born on 23rd August in England. Her father was Walter Sutton-Flack (1841 - 1907) and her mother was Sarah Louisa Mayo (1838 - 1925).

1920 On the US census Walter's widow Gwendoline is recorded as a nurse aged 32 at the Hospital of the Good Shepherd at Syracuse Ward 16, Onondaga, New York.

A list of residence of Syracuse arriving at Ellis Island, New York, has been transcribed and Gwendoline appears on the list three times: 1921, 1922, and 1923. Her address is given as: 220 McClelland Avenue, Syracuse, N.Y.

1970 Gwendoline's death was registered in the second quarter of 1970 at Basingstoke in Berkshire, England (see last line).

AGE should be stated in years, months and days. In case of stillbirths write "born dead".

So far I have been unable to find when and where Ethel died.

As for Gladys Pocock notes I have on her say she married a man named Collier Reineke. However I have been unable to locate such a marriage. And I have been unable to locate a date of death.

APPENDIX

1890. Examination of Mr. Horatio Nelson Hardy by a select committee of the House of Lords on Special Hospitals in London reported in *House of Commons Papers*, Volume 16, 12 May.

Question: Can you tell us at all how a person would set about getting up a special Hospital?

Response: Yes; it is very simple. A medical man who wanted to get fame and reputation would get a few friends of his together, and form a committee; then someone would be got, a young man who had not a great deal to do, who would work the thing, who would

run it, as the Americans say, and he would issue a number of advertisements pointing out that such a hospital had been long wanted, and supplied a great void, and that the staff was the most capable that ever was known for treating special diseases of women and children, and the eyes, and the nose, and the toes, and every other part of the body. And an arrangement would be made by which the secretary would receive a certain proportion of the receipts, and he would get some friend to advance a little money, and they would take an old house, perhaps a tumble-down house which no one could be got to rent in ordinary circumstances, and he would fit up a few beds in it, and open an out-patient department, and then the thing is done.

Question: Does such a hospital as that get on to the Hospital Sunday Fund?

Response: Certainly; as soon as it had been established for three years it gets on the Hospital Sunday Fund.

Question: But how do they manage to exist during the three years?

Response: That is a question which I think probably the secretaries know more about than has ever been published; but all one can judge from is, that occasionally there are revelations. There was, for instance, in the case of a special hospital for skin diseases; in which it appeared that the secretary, after taking up a hospital like that, worked it a great deal for his own benefit; the arrangement was, that he got 15 per cent on the receipts, and he worked it up from, I think, £1,400 a year to about £3,000 a year, on which he would get, of course, £450 a year, partly from payments of the patients, and partly from the contributions of the charitable, to whom it was represented that the hospital was doing a most important work, and had to be supported, and all the rest of it.

Question: Then, I suppose, there is also the annual dinner and bazaar?

Response: Annual dinner and bazaar, and fireworks of all sorts.

Question: I fancy the bazaars are not confined to special hospitals?

Response: Not at all.

Question: Sometimes a very great deal of expense is undertaken, which is entirely speculative, and the returns are not equal even to the original expense of the undertaking?

Response: Yes; that sort of thing is overdone.

Question: Is it the case that the better the position of the president the better the chance of the hospital?

Response: Yes.

Question: The treatment in any hospital is not very expensive to the hospital, is it ?

Response: Do you mean of persons as in-patients or as out-patients?

Response to Resposne: As in-patients.

Response: As in-patients it is expensive.

Question: Is there a profit to be made in a general way out of a charge for a patient of a guinea a week ?

Response: No; I do not think there is. I think the speculative hospitals, which I understand your Lordship to be referring to, do not lay themselves out so much for treating patients as in-patients as they do for treating them as outpatients; it is from the out-patients they make their money; the out-patients will pay 1s., 2 s., 3, 4 s., or 5 s. for treatment.

Question: Are you speaking now of the Jubilee Hospital?

Response: I am not speaking now of the Jubilee Hospital; I do not know anything more of the Jubilee Hospital than I have already told you.

Question: You were speaking of the manner in which speculative hospitals manage to get on?

Response: Yes they can make considerable sums from the treatment of out-patients, and they do; and it was principally by the treatment of those outpatients that that hospital to which I referred, the Skin Hospital, made its money.

Question: Will you continue your list?

Response: The next is the London Skin Hospital in Cranbourne Street, Leicester-square. My objection to it is, in the first place, that skin hospitals are not wanted, and in the second place, that if they were, there are already two skin hospitals, which are quite sufficient for the wants of the inhabitants who are afflicted with those diseases; they can be treated at general hospitals quite as well as at special hospitals, and there are already two, one at Blackfriars and the St. John's, two well-known hospitals.

Question: Do you know anything about the Skin hospital; how it was founded, for instance?

Response: No, nothing but a small hospital of that kind is wasteful, necessarily wasteful. It is necessarily wasteful to have a small hospital of that kind, because the expenses must be largely out of proportion to those at a large hospital; neither can they have the advantage of the staff of a large hospital. All those patients could be far better treated at a large general hospital.

Question: And with regard to the skin hospital in Cranbourne-strect: in this return, which has been furnished to us by the Charity Organisation Society, there is no record of the cost of occupied beds, or the number of in-patients, or the cost of in-patients; there is nothing except the notification of 725 out-patients?

Response: That probably will be because it was only furnished in 1887; it is one of the new hospitals, and that return, I think, dealt with those treated in 1887.

Question: There is one question I wish to ask you. You mentioned your wish that some of these special hospitals should be abolished; but there was one class of special hospitals; to which you referred, in regard to which you stated that certain special hospitals were unnecessary because of the existence of other special hospitals?

Response: Yes.

Question: Then am I to take it that you would not abolish all the special hospitals, those, for instance, for the skin; you mentioned that one of the skin hospitals was apparently unnecessary, because there was already the St. John's Hospital for the treatment of these cases ?

Response: And another at Blackfriars.

Question: Therefore I may take it you do not think it necessary to abolish all special skin hospitals?

Response: No, in the present state of affairs; they have arisen in consequence of some of the general hospitals not giving sufficient attention to these special departments; but if the general hospitals were properly organised, I think it would be possible to abolish the special hospitals without any detriment to the public interest.
